

ZIPPY FREE - passeggino

Meeting your baby's glance, reassuring him and smiling to him, witnessing his way of discovering and seeing the world. Observation is part of his growth and the presence of his parent allows him to feel protected and nursed, free of discovering all what surrounds him.

The well-known practical feature of Inglesina's Zippy system combines with a true requirement of today's mum, and thus comes Zippy Free, the stroller conceived for parents looking for a single product able to join together compact dimensions and technical excellence.

The Zippy system, besides the top features that make it unique, has something important to add: the seat's reversibility, allowing to change the baby's position from facing street to facing mum.

Zippy Free, free to look always towards the best!

- Umbrella closure, small dimensions (height 100,5 cm when closed), ONE ACTION FOLDING - "It can be opened and closed with only one hand".
- Handles which can be rotated, with ergonomic grips, adjustable in height.
- Useful signals to ease the hooking of the transport seat.
- Pivoting front wheels, with lock-unlock mechanism which, once activated, automatically reaches its ideal position.
- Wheels in PP + EVA (diameter: 185 mm).
- Active brake: once activated it automatically reaches its position thus ensuring greater safety in use.
- Capacious storage basket homologated till 3 kg weight.
- Equipped with handy standard cup holder.
- Lateral handle for transport.
- LIGHT seat, REVERSIBLE (can be oriented both facing mum or facing street).
- It can be closed with the seat both facing mum and facing street.
- Easy system for hooking and unhooking from the chassis.
- Adjustable safety belts with 5 anchoring points.
